PROJECTS

EZ Bulletin App (FYP - React Native App)/ Python
(02/2022 - 04/2023)

- **Link:** https://github.com/umaisiqbal/FYP3_Android-App
- Created the EZ Bulletin App using React Native for mobile and React.js for web, delivering a consistent user experience across platforms
- Implemented AI algorithms to provide users with summarized news content, enhancing readability and engagement.
- Developed Web Panel to manage the App user's records
- Integrated backend services and APIs using RESTful architecture.

Clarya (03/2025 - Present)

- **Built a real-time email verification tool** with bulk validation and spam detection features.
- **Integrated secure APIs** for precise verification, ensuring data safety and high deliverability.
- **Enhanced lead generation** with tools that identify unreachable or fake emails efficiently.
- **Improved campaign ROI** by filtering temporary and invalid emails to boost sender reputation.

Medivo (09/2024 - 11/2024)

- <https://medivo.health/>
- **Developed a HIPAA-compliant medical billing platform** with advanced data privacy and security features.
- **Integrated EMR systems support**, including Allscripts, Cerner, and Epic, for seamless healthcare operations.
- **Implemented certified medical coding workflows** across diverse chart types to ensure billing accuracy.
- **Built admin tools for continuous monitoring** and regular updates to maintain compliance and performance.
